PURPOSE

The Delta Science Program, with support from the UC Davis Coastal and Marine Sciences Institute, is coordinating a Social Science Task Force (SSTF), based on outcomes and recommendations from various efforts including the [Delta Independent Science Board's review of the Delta as an Evolving Place](#), the [2016 Science Enterprise Workshop](#), and the [Delta Science Plan](#). Composed of individuals with a diverse set of expertise in the social sciences, the SSTF will be charged with developing a strategic plan to strengthen and integrate social sciences into the science, management, and policy landscape of the Delta. The purpose of the January 29th kickoff meeting is for the Delta science community to meet and engage in discussion with the SSTF members. Representatives from agencies and collaborative groups will present work related to the Delta and ongoing challenges to provide the SSTF members with a better understanding of the Delta science and management landscape, followed by questions and discussion. Outcomes of this meeting will inform the strategy report.

"Coequal goals" means the two goals of providing a more reliable water supply for California and protecting, restoring, and enhancing the Delta ecosystem. The coequal goals shall be achieved in a manner that protects and enhances the unique cultural, recreational, natural resource, and agricultural values of the Delta as an evolving place."

– CA Water Code §85054
